Customer Reviews

As a Registered Nurse, I found this book to be both informative for children as well as adults. I purchased this book to help my other children better understand their brother's asthma condition. In the process of reading the book, there was valuable information that I learned as well. It explains things in an understandable no nonsense way. This book is very well written, a must read for anyone w asthma, as well as their family members and friends. Would be especially helpful for teachers with asthmatic students.

I am a R.N. and have 3 grandsons with severe asthma (7, 7, & 8), all of whom have been

hospitalized with it at various times. I was looking for a book with some (meat) to it that would be appropriate for their ages. Not only did they learn more about their asthma, I discovered that this book was actually a gold mine of information for just about everyone. I have now ordered 5 copies of it. I donated several of them to the School Nurses of their schools. I have also made a written request that I would like each of their teachers to read this book when my grandchildren are assigned to their classes. This should be required reading for ALL caregivers of asthmatic children!
