Dr. Z's Beat The Racetrack

Synopsis

From dust jacket notes: "Forget class, condition, past performance, jockeys, and the rest. The Dr. Z system will teach you how to beat the racetrack time after time after time, even if you know nothing about horse racing! Dr. Z's Beat the Racetrack is not a new handicapping method or a book of tips. Very simply, Dr. Z's system is based on proven scientific methods that originated in stock-market analysis, applied to horse racing for the very first time by William Ziemba and Donald Hausch. A mathematical model and its solution indicate how good a possible bet is, whether or not it is advisable to wager, and how much should be wagered given one's betting stake. A thorough reading of the racetrack tote board can provide steady profits with minimal risks on bets to win, place, or show. This business-management approach is easy to follow and will show profits from day one! The Dr. Z system has been tested by the authors themselves. This updated and revised edition of their classic work offers documented proof of how they and others have beaten the racetrack - over a period of years, at tracks throughout the United States and Canada, and even on special occasions such as the Kentucky Derby."

Customer Reviews

If you have been looking for good value betting on a 20-1 shot at the racetrack, you probably won't find it. The really good wagers will be found right here in this sweeping narrative, finely wrought text. You will embark on a narrow, uncrowded journey from Belmont to Santa Anita. If you want to win at the track this is the only book that will change your opinion, and maybe, if you are really a good study, even impact your life. This book is so valuable, please don't tell anyone to read it.

Fortunately, the vast amount of players won't get it anyhow. I hesitate to continue but this is the genuine article. Enjoy the benefits of winning consistently but keep this our little secret. Respectfully submitted, Jerome Lawrence Castle
