Customer Reviews

I don't know of any book whose images have stuck with me for so long. "Nuclear Landscapes" is a chilling look at the remnants of America's vast nuclear weapons production and testing. From the Hanford reservation in Washington state to the south Pacific to the deserts of Arizona you will always be aware that while the photos may look serene there's always enough radiation around to at least give you cancer or some other related malady. Peter Goin knew the risk he was taking, but he left a priceless work for all people to look at and become aware of what we've done to many places on Earth with nuclear testing. One would wish that India and Pakistan would take a serious look and realize that they too have places that can never be inhabited. That they also have nuclear landscapes.

I read this book twice ten years ago when it was still in the library. I haven't been able to find a copy since then, but the images of the hellish, alien landscapes that Mr. Goin photographs are still so vivid that to use words "powerful" or "evocative" would tarnish their terrible beauty. If any book begs to be reprinted, this is it.

Anyone researching locations on nuclear waste disposal sites or areas used for nuclear testing will

find ample material in this book by Peter Goin. If you're looking for images of desolate and abandoned landscapes, this is definitely a great resource.

Awesome, haunting photos, but I expected more shots of the Nevada test site. And only one touristy shot of White Sands? If you love urbex and/or desolate places as I do, you'll enjoy Goin's work.
